In the Matter of )  
 )  
Amendment of Section 73.202(b), ) MM Docket No. 96-240  
Table of Allotments, ) RM Nos. 8946, 9019  
FM Broadcast Stations. )  
(Lockport and Amherst, NY)

To: John A. Karousos, Chief  
Allocations Branch, Policy and Rules Division

REPLY OF CULVER COMMUNICATIONS CORPORATION  
TO COUNTERPROPOSAL OF KEVIN O'KANE

1. Pursuant to §§ 1.415 and 1.420 of the Commission's Rules, Culver Communications Corporation (Culver), by its counsel, replies to the counterproposal of Kevin O'Kane (KOK) filed on January 27, 1997 as directed by the Commission in a *Public Notice* (Report No. 2177), released March 6, 1997. For the public interest reasons set forth herein, the proposal of Culver to allocate Channel 221A to Lockport, New York should be granted and the counterproposal of KOK to allot Channel 221A to Amherst should be denied.

2. In its brief counterproposal, KOK asserts that Amherst, New York, located in Erie County, is more deserving of the Channel 221A allocation, merely because Amherst has a day-time only station and KOK's proposal "would be the first full-time transmission service for Amherst." Counterproposal, p. 1. KOK's unsupported conclusions imply that KOK's proposal qualifies for priority treatment over Culver's Lockport proposal since Lockport has a fulltime AM station licensed to it. In fact, under the Commission's allocation policies, KOK's proposal is not entitled to any such priority. Amherst has licensed to it Station WUFO(AM), which operates on 1080 kHz, at 1 kw daytime (See Appendix A, Figure

024

3). Station WUFO(AM) qualifies as a local aural transmission service and accordingly KOK's proposal cannot be considered as providing a "first local service" to Amherst, for which priority treatment may be justified. See *Amendment of the Commission's Rules Regarding Modification of FM and TV Authorization to Specify a New Community of License*, 5 FCC Rcd. 7094, 7097 (1990).

3. Rather, in examining Culver's Lockport proposal and KOK's Amherst proposal the Commission is guided by the allotment priorities set forth in *Assignment Policies and Procedures*, 90 FCC 2d 88 (1982), which are:

- (1) first full-time aural service;
  - (2) second full-time aural service;
  - (3) first local service;
  - (4) other public interest matters.
- (Co-equal weight given to priorities (2) and (3)). assignments.

Neither proposal would provide first full-time aural service or second full-time aural service. Moreover, both communities have stations licensed to them, and therefore neither proposal is entitled to preferential treatment under priority 3 (first local service criterion). Therefore, both proposals must be compared and analyzed under priority 4, other public interest matters.

4. In making its determination, the Commission is afforded considerable flexibility in its consideration of a variety of factors under priority (4). *Faribault, Blooming Prairie, Northfield and New Prague, MN*, 7 FCC Rcd. 3937, 3939 (1992).

Priority 4 allocations have been awarded according to the size of the two competing communities, the size of audiences and areas served, and the number of aural transmission services each community receives. See, e.g., *Cowden and Tower Hill*, 10 FCC Rcd. 10511 (1995).

5. As previously noted, KOK asserts that Amherst deserves the allocation based on its attempt to claim credit for its intended provision of a first local service to a population of 106,157. As also previously noted, KOK's proposal does not provide "first local service." Moreover, while Amherst may enjoy a numerical population advantage to Lockport, that advantage is based on Amherst's location within the Buffalo Urbanized Area. See Appendix A, Figure 3. By virtue of its location, Amherst is merely a suburb of Buffalo and is interdependent with that community as evidenced by the following: No separate zip codes are assigned to Amherst, rather zip codes for addresses in Amherst are included in the Buffalo NY section of the zip code directory (Appendix B, attached). Nor does Amherst have its own phone number directory. Rather Amherst telephone exchanges are included in the Buffalo NYNEX directory (Appendix C attached). In addition, more Amherst citizens (18,174 persons) work in Buffalo than Amherst (17,861 persons), while the remaining people work in Erie County. Amherst Community Profile dated November 29, 1993.

6. More importantly, Amherst receives fulltime signals from nine commercial FM stations, most of which are licensed to Buffalo, at least 4 AM stations, and 2 noncommercial FM stations. (See

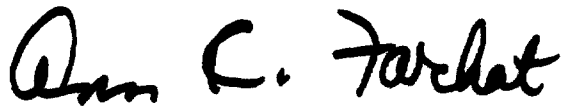

Appendix A, Engineering Statement and Figures 1A, 1B, 2). Furthermore, Station WUFO, the AM station licensed to Amherst, maintains its main studio and transmitter in Buffalo and its daytime contour covers more than 97% of the entire Buffalo urbanized area (Appendix A, Engineering Statement, p. 2). The only conclusion that can be reached is that Amherst's needs are more than adequately met by Station WUFO(AM) and the 11 FM and 3 additional AM stations which provide service to it, all factors which the KOK counterproposal failed to demonstrate let alone address.

7. In contrast, Lockport, New York, the county seat of Niagara County, is located 25 miles from Buffalo, NY. It has a population of 24,426 (1990 U.S. Census). While Lockport's proposed area of coverage (1,932/9 sq. km) exceeds that of Amherst's (1,872.2 sq. km), Lockport receives radio service from its one full-time AM station and complete transmission service from only three other AM stations and one FM station. (See Engineering Statement). Most important, unlike the KOK proposal, Culver's Lockport proposal will provide fifth aural service to 2,679 underserved persons. Appendix A, Engineering Statement. Based on the foregoing, KOK's lone advantage of its higher population based on Amherst's inclusion in the Buffalo Urbanized Area should not be dispositive where other significant public interest reasons to award the allocation to Lockport are present as demonstrated herein

by Culver.<sup>1</sup> KOK's proposal has utterly failed to demonstrate that these public interest factors, including service by Culver to more than 2,679 underserved persons, are outweighed by its lone population advantage and accordingly, Lockport is more deserving of the FM allocation under the Commission's allocation policies and procedures guidelines.

Accordingly, for the foregoing reasons, the proposal of Culver Communications Corporation for allotment of Channel 221A at Lockport, New York should be granted and the counterproposal of Kevin O'Kane seeking the Channel 221A allotment at Amherst, New York should be denied.

Respectfully submitted,

Ann C. Farhat

cations Corporation

March 21, 1997

---

<sup>1</sup> Culver is the licensee of Station WLVL(AM) in Lockport and its principal, Richard C. Greene, a long-time resident. Culver has initiated this rulemaking and continues to support the allocation to Lockport. The KOK proposal is being advanced by Kevin O'Kane, of Vernon, NY, a community located between Syracuse and Utica, well outside the Amherst/Buffalo, NY area.

CULVER COMMUNICATIONS CORP.

Comparative Contour Study  
Proposed New Commercial FM Station  
Ch. 221A (92.1 MHz.)  
Lockport, New York

ENGINEERING STATEMENT

This engineering statement and attached figures have been prepared on behalf of Culver Communications Corp. ("Culver"), which has a pending Rulemaking Petition (MM Docket No. 96-240, RM-8946) to establish a new commercial FM broadcast allocation on Channel 221A (92.1 MHz.) at Lockport, New York as that community's first local FM service. In response to a counterproposal dated January 24, 1997 by Kevin O'Kane ("O'Kane") to specify allotment of Channel 221A to Amherst, New York, this comparative contour study of AM and FM fulltime service has been prepared.

The Culver petition proposes reference co-ordinates for the Lockport, New York allocation at N 43° 10' 12", W 78° 41' 54" and the O'Kane counterproposal proposes reference co-ordinates for the Amherst, New York allocation at N 42° 58' 42", W 78° 48' 00". In both cases operation at 6 kilowatts effective radiated power with antenna radiation center at 100 meters above average terrain has been assumed with an appropriate directional pattern to protect CKPC(FM), Brantford, Ontario. Terrain data from which Culver and O'Kane 60 dBu contours were determined is from the DMA-3 database.

Figure 1A is a 1:120,000 scale FM allocation map which depicts both Culver and O'Kane 60 dBu contours superimposed on the map. The 60 dBu contours of WSJZ, WJYE, WDCX, WYRK, WMJQ, WGRF-FM, WEDG & WHTT-FM (all Buffalo, NY); WBLK (Depew, NY); WNUC (Wethersfield Twp, NY) and WKSE (Niagara Falls, NY) are also depicted. The O'Kane 60 dBu contour is encompassed completely by the 60 dBu contours of WJYE, WDCX, WYRK, WMJQ, WBLK, WGRF-FM, WEDG, WHTT-FM and WKSE. The Culver 60 dBu contour's land area coverage is only encompassed completely by WMJQ with only partial overlap by the remaining stations. The Culver proposal would provide service to an underserved area centered about Lyndonville, NY. See Figure 2 for AM contours and overlap.

Figure 1B is a 1:120,000 scale FM allocation map which again depicts both Culver and O'Kane 60 dBu contours. The 60 dBu contours of non-commercial stations WNED-FM, WFBF, WBNY and WBFO (all Buffalo) are also depicted. The O'Kane 60 dBu contour is encompassed completely by WNED-FM and WBFO and overlapped by WFBF and WBNY. The Culver 60 dBu is only partly overlapped by these four non-commercial stations with a substantial unserved area northeast of Lockport.

Figure 2 is a photoreduced 1:250,000 scale AM allocation map on which are depicted the nighttime interference-free contours of WGR, WBEN WNED-AM & WWWS (all Buffalo); WECK (Cheektowaga, NY); WXRL (Lancaster, NY); WLVL (Lockport, NY) and WHLD & WJJL (Niagara Falls, NY). The nighttime interference-free contours of WWKB

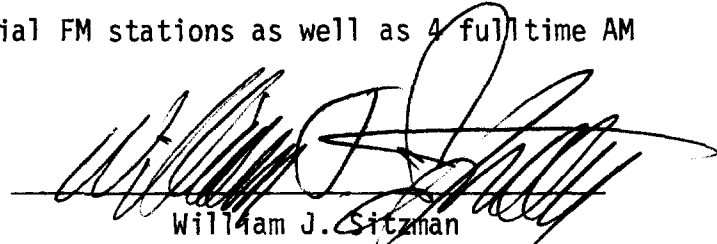

(Buffalo, NY) and WHAM (Rochester, NY) are pertinent to this study but extend beyond the map boundaries. The proposed O'Kane 60 dBu contour is totally encompassed by the interference-free contours of WGR, WBEN, WWKB and WHAM and in addition totally encompassed by 9 commercial and 2 non-commercial FM 60 dBu contours. The segment of the proposed Culver 60 dBu contour shown on the AM allocation map is beyond, as a worst-case showing, the WBEN(AM) and WGRF-FM contours and overlapped by only 3 AM (WGR, WWKB & WHAM) contours and 1 FM (WMJQ) contour. Hence the Culver Communications Corp. Ch 221A proposed 60 dBu contour would provide a fifth aural service to an underserved population of 2,679 persons as determined from a minor civil division map and the 1990 US Census Data.

Figure 3 is a map of the Buffalo, New York Urbanized Area, depicted by all shaded portions. It is noted that Amherst, New York is included in the Buffalo Urbanized Area. Radio station WUFO is licensed to Amherst, New York and is identified with Buffalo in that 1.) the address of its studios and offices is 89 LaSalle Avenue, Buffalo, New York 14214; 2.) the transmitter and tower are located well within the corporate boundaries of the city of Buffalo, New York; and 3.) WUFO serves 97.6% of the Buffalo Urbanized Area with a city-grade 5 mv/m contour.

#### CONCLUSIONS

Based on the foregoing engineering study, the Culver Communications Corp. proposal to allocate FM Ch 221A to Lockport, New York will provide the first FM service to be licensed to Lockport and would also provide a fifth service to an underserved population of 2,679 persons. Conversely, the O'Kane proposal to allocate FM Ch 221A to Amherst, New York would only add one more service to an area already served by 9 commercial & and 2 non-commercial FM stations as well as 4 fulltime AM stations.
